Fraction Flag

Which fraction of the flag is shaded? Explain how you know. Record your answer in the box using the word 'because'.

Record your reasoning here.

Now draw your own fraction flag with a different fraction shaded. Remember, the shaded parts don't need to be next to each other to make it a fraction of the whole.

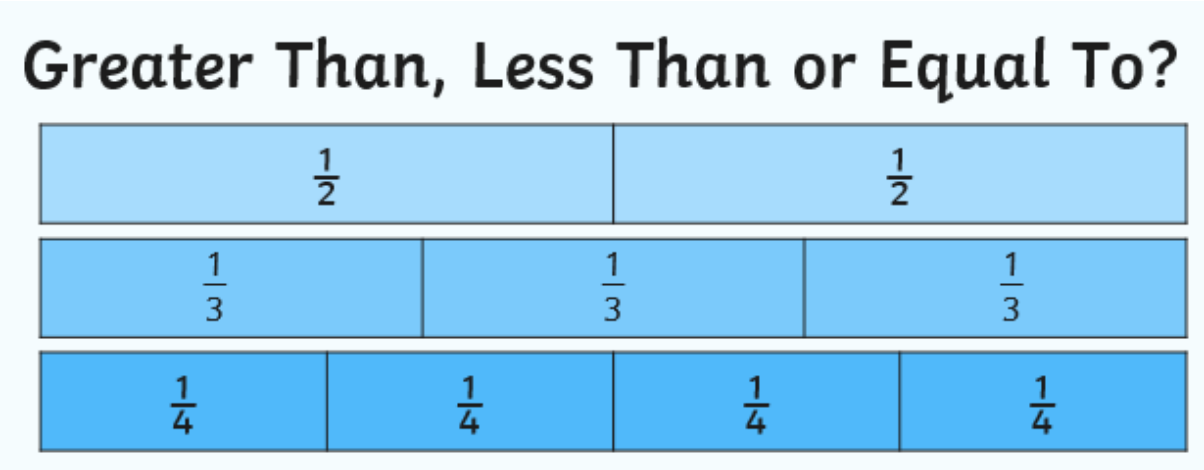

Fraction Wall

Look at the fraction wall below. It shows you the size of each fraction and compares it for you.

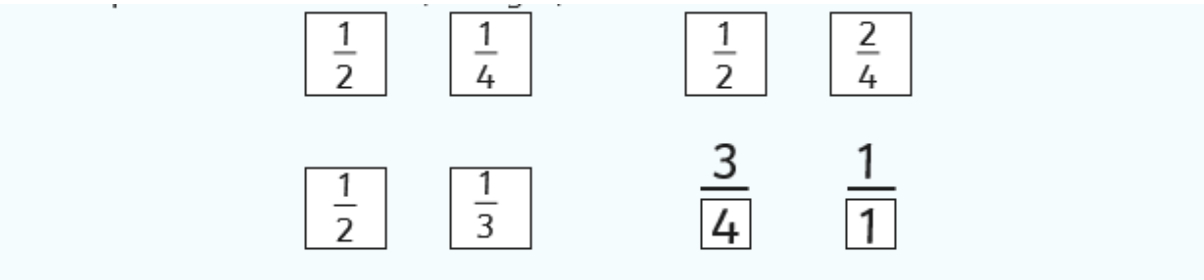

The first one shows 2 halves. 2 halves make a whole.

The second one shows 3 thirds. 3 thirds make a whole.

Is 2 of these thirds greater or less than 1 half?

Now complete these sentences using <, > or =.

Can you make your own fraction wall? You could use Lego, building blocks or strips of paper. Get creative!
