Addition to 5

How many ways can you make the number 5?

Using small objects or toys, (eg. Dry pasta, toy cars) explore how many ways you can make 5.

Separate the 5 objects into 2 groups. How many are in each group?

1 + 4 = 5

The answer will always be 5 because you started with 5 objects.

If you can do this, have a go at doing this with a different 1-digit number. Record your sums in your blended learning book and take photos to add to Tapestry.
